I am interested in creative things related to design such as Interior Design and Furniture Design. I am currently Interior Design student in Lasalle College Vancouver B.C. Canada. I believe that the skills, knowledge and experiences I have gained at the school make me an ideal candidate, expert and creative for any kind of design projects.

I have developed critical thinking and researching skills; also, I have improved my design and drawing skills in the school. Moreover, I have trained and expanded using different types of software such as Adobe Illustrator, In design or AutoCAD etc. over the past 2-3 years. It helped me to make my works a little more perfect.

As Interior Designer, having good communication skills helps improving the design processing. I am native Korean, and I am not perfect but good at English. In addition, I am intermediate speaker of Japanese. My skills will help to communicate or translate to the clients who are from different countries.

I had opportunity to design interior of residentials, commercials and retails in Lasalle College Vancouver. I am confident that my projects and experience in the school including my skills. I can provide my current and past projects.

Thank you in advance for your time and consideration. I am sincerely looking forward to speaking about the opportunity.

# YEONSOO JEONG

I am an Interior Design graduate who loves furniture.  
I value the freedom of thinking and creativity of design.

I am also interested in Furniture Design. I love to work with the variety of Furniture and Interior Design. Moreover, I love to work to improve and develop my skills and knowledge.
