
EULÀLIA BONAVIA BRILLAS

Introduction

My name is Eulàlia Bonavia Brillas and I'm 21 years old. I'm currently studying the 4th of Fashion Design at LCI Barcelona. My interest is related to the visual world and costume making, although I have other hobbies such as dancing and photography.

Motivation

One of my main passion is music, which inspires me in my work and also in my day a day life. It also goes hand in hand with my enthusiasm for dancing. I must say that these are the things that help me become who I am right now.

It also made me realize what I wanted to create and work in the future for it was all the costumes we wore in each show that made me realize what I truly like.

About photography, I have to say I was influenced by my father who is a photographer. That's why I fond myself creating things more visually based than others do.

Another thing that motivates me is learning new things, it could be either a new language or past history. I think it's important for everyone to be constantly active.

To end it, I would say I'm a friendly curious hard working person who likes to discover new things.
