Profile

"Good design is about turning dreams into reality" - John Saladino

I am a designer who always seeks the balance between aesthetics and functionality in a space, in each project I seek to create an experience for the user and always try to translate the personality and tastes of the client through interior design. For me, interior design is responsible for improving the quality of life and creating environments worthy of being preserved in memory.

"There are three possibilities for design: Yes, No and **WOW! WOW** is what you have to aspire" - Milton Glaser
