Natalia Padroni 

The collection presented below is inspired by sunflowers, not in their colors, but in their meaning, shape and behavior.

This plant speaks of love and devotion, promising fidelity to the sun and to life; spinning around it, moving to the rhythm of the wind, extracting it's energy from the light, bringing it's splendor and beauty to the last moment of life.

helmut newton

The sunflower can represent a lot, from faith and spirituality to ambition, wealth and good luck.

Mi paleta de color va desde el blanco y el Beige hasta escalas de cafés y amarillos ya que estos hacen alarde a la belleza y calidez que representa el girasol.
