SketchUp

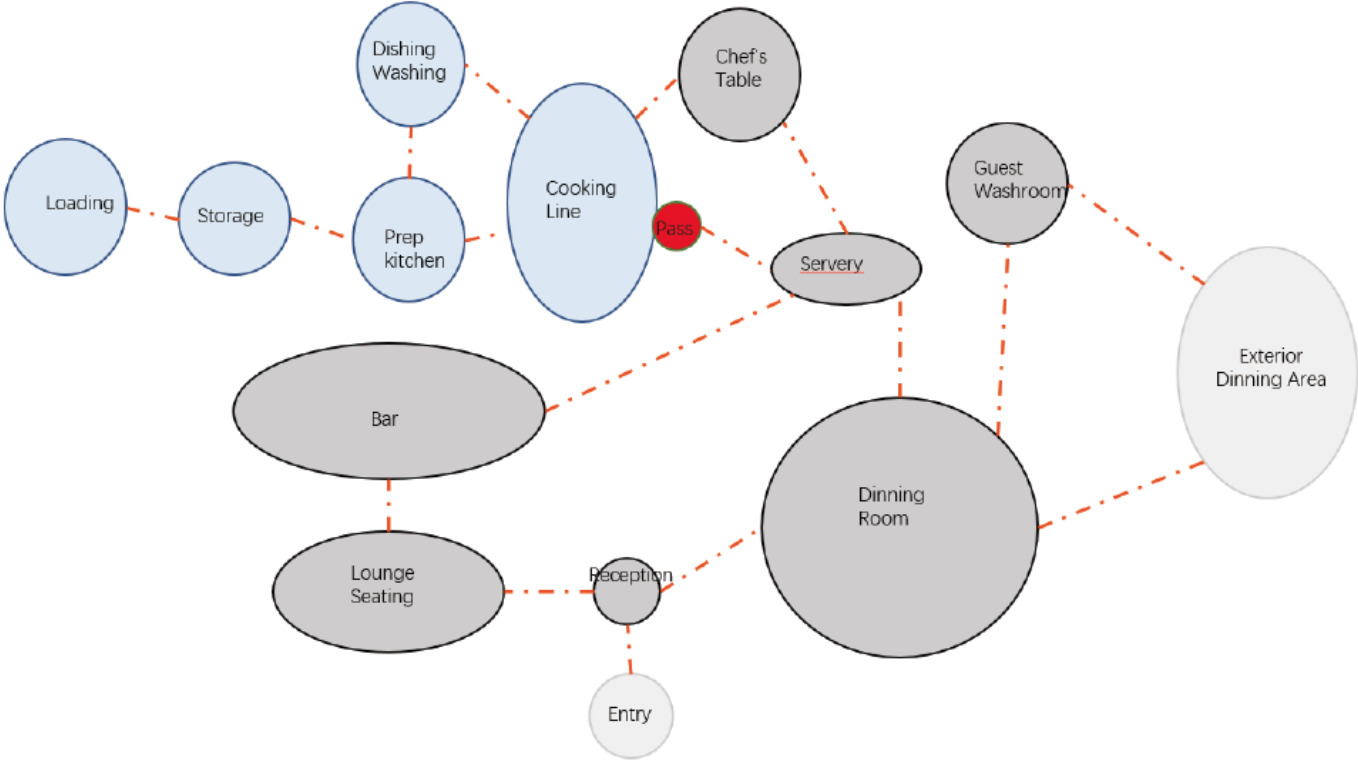

EnScape

The Olive Tree Restaurant is aim to bring the nature into the building. The space will be as a place that people can relax and release pressure from work. The seating type will combined interior and exterior. Using the big windows to replace wall to confused the interior and the exterior space. The most important space will be the dinning space itself as the restaurant want to bring a different atmosphere than others to the customers. And the first impression for the restaurant to the customers will be the Transparent of the buildings and the nearest natural view.
