CONCEPT

Conceptual design is to create a modern architectural design office inspired by nature for employees and customers on the basis of comfortable and relaxed working environment.

INSPIRATION BOARD

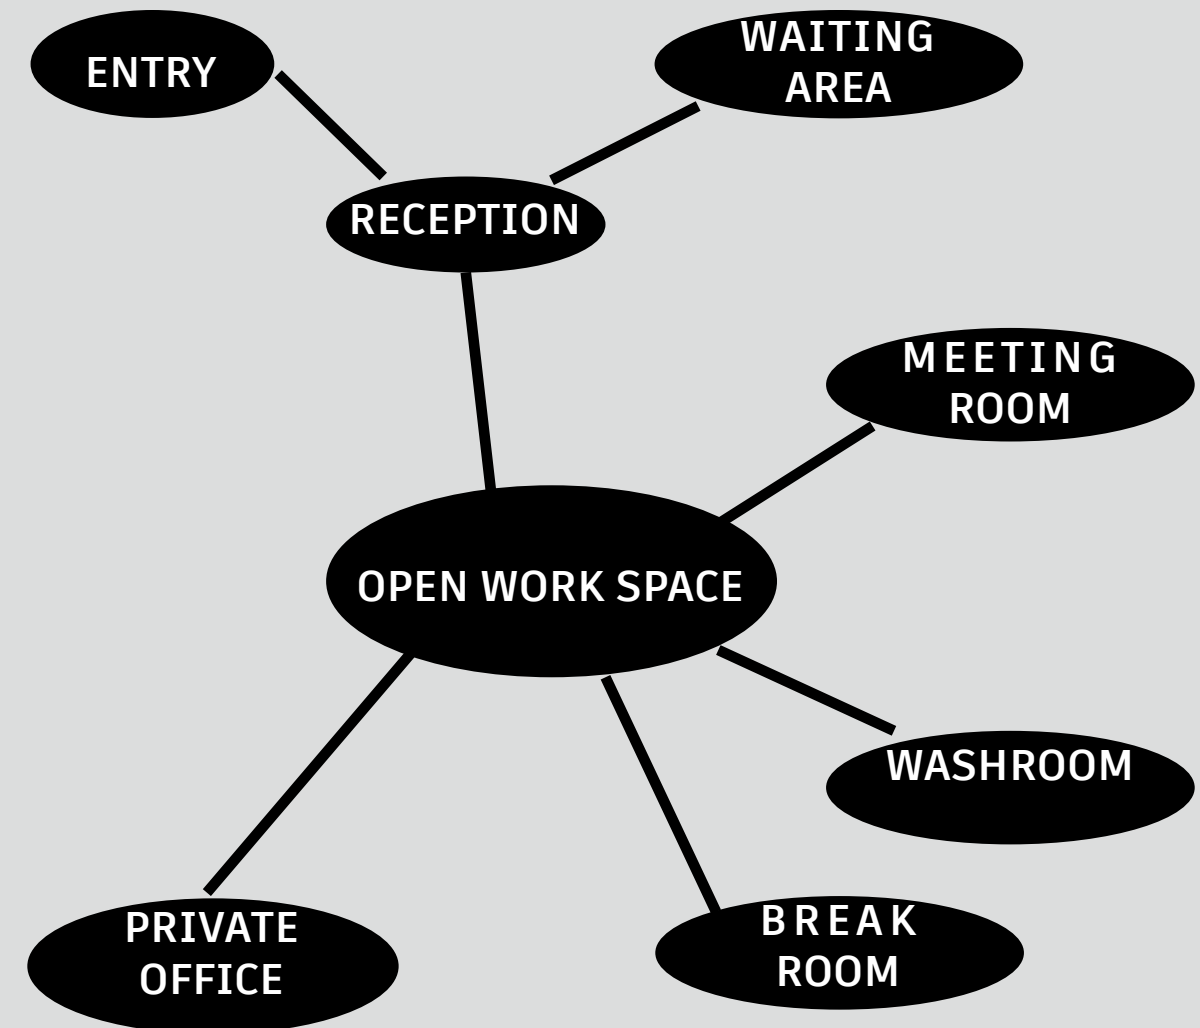

SITE ANALYSIS

Location: 139 Water St Vancouver, BC

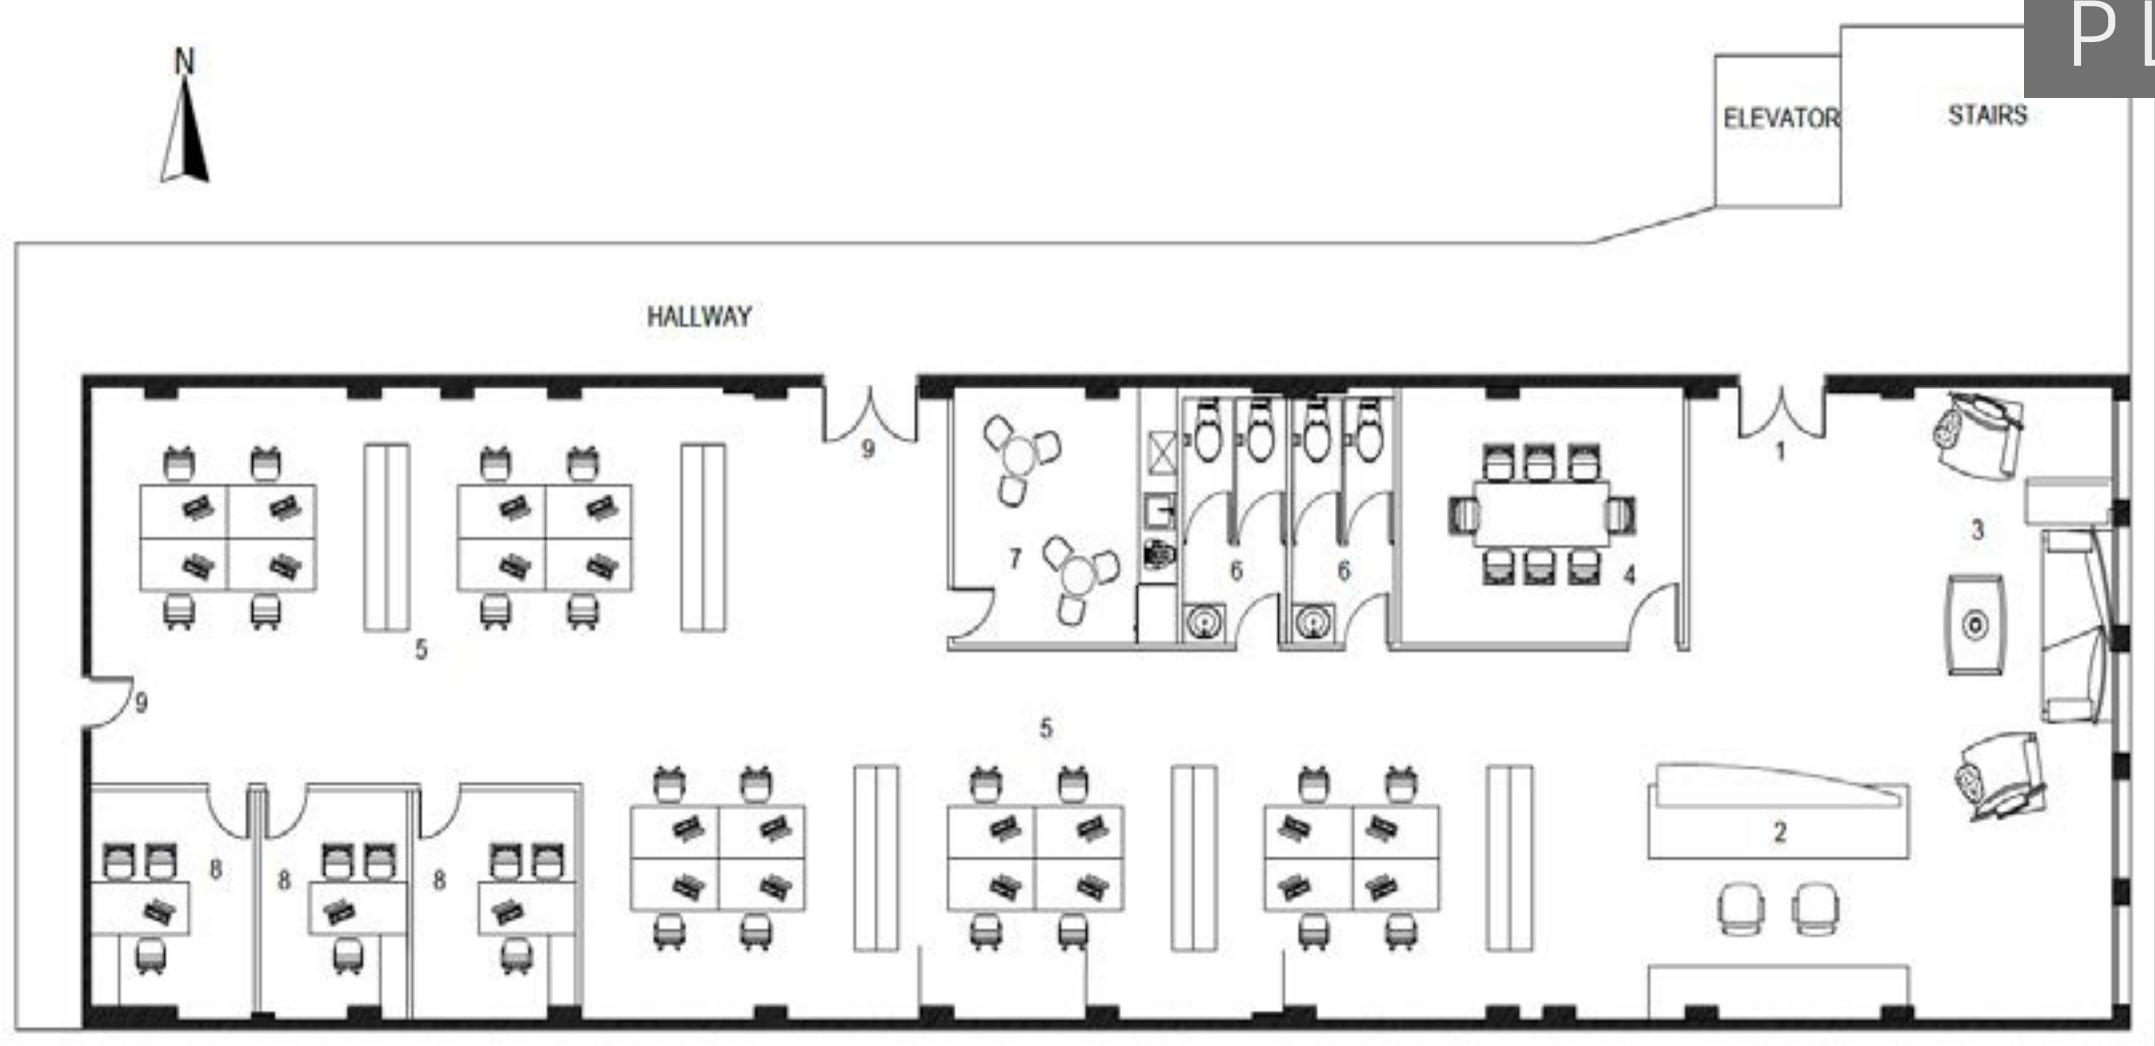

The place is located in Gastown in Vancouver. Gastown is the original settlement of Vancouver, British Columbia, Canada, which later became the core of the city. It is currently a national historic site located at the northwest end of the city center on the east side, adjacent to downtown Vancouver.

Now, Gastown is a mix of "hip" contemporary fashion and interior furnishing boutiques, tourist-oriented businesses, restaurants, nightclubs, poverty and newly upscale housing. In addition, there are law firms, architects and other professional offices, as well as computer and internet businesses, art galleries, music and art studios, tattoo parlours, and acting and film schools.
