ABOUT ME

Young fashion designer with high level technical skills, great ability and experience at working under pressure with very rigorous deadlines.

Previous experience in designing women and menswear, also working with a wide rank of fabrics.

Very interested in the new fabrics investigation and in the design department.

Periplo, a collection of 8 looks, is inspired in broad strokes, on my travels around the world and the fusion of tens of cultures. Where I want to transmit how the craftwork of some tribes can be united with technical fabrics from the most developed countries.
