## RECEPTION

The wall is designed with green features and wood. Biophilic elements have been shown to reduce stress and support positive emotions and mood. Biophilic elements have been shown to reduce stress and support positive emotions and mood.

## COLLABORATION AREA

---

This gives members of the community the ability to create their own experience using the space, and allows the space to have personality while serving differing needs. A unique design adds an exceptional character to an interior, creating an attractive and comfortable informal meeting place.

## BRAK ROOM

---

## MEETING ROOM

---

The space is designed to be full of different, interesting details and surprises around each corner, as well as uniquely themed meeting rooms.

---

# PRIAVATE ROOM

This area offers for workers to relax or taking a nap, and the whole gives a comfortable atmosphere.

## RELAX ROOM

There are wooden dividers to give people privacy

## WORK AREA

---

for their work, without boxing them into cubicles.
