

I chose *MISTRAL* as my font because it reminds me the special emotion of freedom. I would like to make my life more simple and freedom with meaningful, so I think this font will be the best choice.

This color makes my feeling calm down. When I see it , I always imagine the ocean with no limited. It means when I face problems, I can handle it in cool.

I would like to put it as the secondary color. It leaves me an elegant impression. It also like the sunshine in winter can warm my heart.
