

MICROFIBER AND NANOFIBER TEXTILE

BY : ZAHRA ELVITA WENING NASTITI

WHAT IS MICROFIBER?

Microfiber is the terminology used to describe finely manufactured fibers and the technology name for the development of these fibers.

MICROFIBER TEXTURE

MICROFIBER AUTOMOTIVE WIPE

MICROFIBER CLEANING LENS

MICROFIBER TOWEL

- 10 Times smoother than silk.
- 30 Times smoother than cotton
- 40 Times finer than wool, and
- 100 Times finer than human hair

WHY MICROFIBER SO EFFECTIVE ?

Creating static electricity, such as magnets, polyester, and polyamide

Positive electric power which will attract negative energy from dust, dirt, fleas, and mites

MICROFIBER

Can be used
hundreds of
times

Eco - friendly

Super
Absorbent

The color more
attractive and
elegant

Removing
bacteria from
smooth
surface

HOW TO CARE FOR MICROFIBER ● TO KEEP IT DURABLE ●

Beforehand, you must pay attention to the following 3 things before washing the microfiber fabric :

- Should not be exposed to heat
- Cannot Use Fabric Softener (Softener).
- Cannot Use Detergent (Rinso, etc.)

- Separate the microfiber with another fabric
- Wash in cool or warm temperature without detergent.
- Let it dry on its own, don't use the dryer in the washer
- Set the heat setting to the lowest level in the washer dryer.

HOW TO WASH MACROFIBER

HOW TO WASH MACROFIBER

- Washing your hands is often the easiest method of cleaning
- Let the dirty microfiber cloth soak in cold or warm (not hot) water
- Use your hands to help move the towel or rag so that it loosens the dirt.
- Rinse well and let it dry on its own.

The newest microfiber is the nanofiber, the characteristics of the nanofiber are not much different from the microfiber. Nanofibers have the advantages of high permeability and, low resistance to mass transfer.

MASK

SIMILARITY OF MICROFIBER & NANOFIBER

Better than
latex
pillows.

Make it the
best sleeping
pillow,

These pillows
less likely to
cause allergies
when used.

Very light,
soft, does not
absorb stains
and dirt
