

A diver in red shorts and a black fin is swimming underwater. The water is dark blue and filled with numerous small pieces of plastic waste, including bottle caps and fragments. In the background, a large, crumpled piece of white plastic is visible. The overall scene conveys a message of ocean pollution.

Have you ever wonder how our ocean is blue?

"toxic chemicals from the dye of denim, resulting environmental damage to our ecosystems. It is estimated that 70 percent of Asia's rivers and lakes are contaminated by the 2.5 billion gallons of wastewater produced by that continent's textile industry."
