# Overall Viewing

In order to give enough relaxing environmental feeling to the staff, the wood material is using through the whole space, at the same time, the path in the building is designing as the fully opened pathway, which means after moving into the building, staff can simply see through all the space, which is helping them to gain more energy instead of working in the small room. All of the office have the either side widows or top windows in order to avoid the fully closed environment.

## Front Door

---

The Front view of the entrance, the symbol of the brand is using on green feature to enhanced the natural feeling, top wood panel give more sense of depth in order to reduce the pressure from top area.

## Board Room

---

Board room using the fully windows wall which give a opened feeling to the people who will goes into, the rooms next to it is the normal wall which provided the vision block for clients to look into the working area.
