Summer fashion is officially on our radar with the temperature rising and the days becoming gradually longer. After a year of changing from pyjamas into loungewear and then back into pjs every day, we are SO ready to look ahead and see what the warmer months have in store for us in the style department.

We’ve scoured the runways of Paris, London, Milan and New York to bring you a cheat sheet for this season’s biggest trends - because anyone who’s seen *The Devil Wears Prada* knows that trends start at designer shows before working their way down to the high street within a matter of months.

# DIOR

A close-up photograph of a woman's hand with bright red manicured nails. She is wearing a large, ornate diamond ring on her ring finger. Her hand is gently holding the snout of a small, dark-furred dog. The dog's mouth is wide open, revealing its pink tongue and sharp white teeth. The woman is also wearing a gold-colored chain bracelet with circular links on her wrist. The background is a soft, out-of-focus blue-grey.
